Product description:

- Kidea **subtraction learning** math printer.
- This unique roller stamp allows you to create as many as 100 different combinations of math activities - just rearrange the numbers with the dial. Slide it across a sheet of paper and the tasks print themselves.
- Thanks to the stamp, learning subtraction becomes a pleasure.
- It is also a creative teaching aid for parents and teachers, who don't have to

think about coming up with combinations of mathematical operations.

- The math printer will be perfect for repeating material before a test or a midterm!
- Comes with a bottle of ink.
- Package dimensions: 15 x 12 x 3 cm
