Product description:

A set of FIMO Professional thermosetting plastic compound for making precise decorations, ornaments, figurines and jewelry.

- **Set "Basic" basic colors**

- Package contains 12 color cubes of 25g each
- Package size: 22 x 12 x 1.5 cm

FIMO is the most popular series of modeling clay, used for hand-crafting both hobby and commercial purposes.

- The mass is ready to use as soon as you take it out of the package.
- After a moment of kneading, it becomes very soft, malleable and smooth, allowing you to make precise pieces of decoration.
- Once finished, the completed pieces should be fixed by placing them in an oven preheated to **110 degrees Celsius for about 30 minutes**.
- What distinguishes FIMO modeling paste from the competition is its invariability - the made figurines after firing do not lose volume, color saturation, do not crack or crumble.

FIMO mass, is available in 29 colors per piece and in kits, including accessories for processing and accessories for creating jewelry. The brand's modeling clay can be used safely by the youngest - the products meet the requirements of EN 71-15 standards and the EU Toy Safety Directive.
