**Product description:**

- Colorful electrostatic note pads, ideal for taking notes or leaving messages and reminders.
- They are an excellent alternative to traditional sticky note pads, they perform the same function, but have much greater capabilities.
- They are not made of paper, but of a special, durable adhesive film that adheres with its entire surface to the wall.
- The innovative, patented technology uses the physical phenomenon of electrostatic interaction between charges, which allows the cards to adhere to many dry surfaces without the use of glue, pins or tape.
- The front side of the card is suitable for writing and drawing with any writing instruments, while the other side (white) is dry erasable and can be written on with a dry erase marker that can be easily erased.

- 
- The electrostatic card block is completely safe for the ground - it does not stain, does not leave any traces.
  - Size: 75x75 mm
  - Color: yellow
  - In each block of 100 cards.
  - Packed in a plastic bag
