## Product description:

- Convenient packaging with a transparent lid that can be used for mixing colors
- Watercolor paints are water-based paints used for painting on paper.
- They are in the form of dry buttons that, when moistened with water, produce ready-to-use paints almost immediately.
- ASTRA watercolors consist of high-quality, finely crushed pigments, combined with a water-soluble binder
- In addition to pigments and binders, watercolors contain fillers that make the paint duller as it dries.
- As a result, by applying the paint thicker, it is possible to paint with techniques similar to gouache, and in greater dilutions with techniques characteristic of

---

watercolor.

- Watercolor can be used in combination techniques with tempera paints, poster paints and ASTRA wax crayons.
- Size of buttons: 25mm
- More than 98% of the composition is of natural origin
- Number of colors: 24
- Comes with a size 2 round brush
