Product description:

The clay we offer can be used at all stages of art education and for therapeutic activities. Due to its parameters, this clay is perfect for modeling, carving (sticking), rolling, pressing and casting in plaster molds. After drying, the product can be painted with ASTRA paints or subjected to a firing process at the temperature of 850-1200 ° C. Wide artistic and educational opportunities place sculptural clay among the noblest plastic materials.
