Product description:

- Modeling clay is a high-quality thermosetting plastic.
- Perfect for creating models and mockups.
- You can also make small accessories from modeling clay: clips, brooches, and key rings.
- Models can be made by hand or by squeezing patterns into molds.
- · Hard modeling clay softens due to the warmth of the hand.
- Models should be cured by heating in an oven at 100–110°C for 15–20 minutes.
- Finished models smeared with vegetable oil take on more vivid colors.
