Product description:

Prescription rubber bands are widely used in industry, small manufacturing, food industry, agriculture and horticulture. Also in modeling, offices, banks, pharmacies, households and many others.

The features of rubber bands that make them applicable in so many different fields are:

- durability
- flexibility
- softness, thanks to which the product with which the rubber band comes into contact will not be damaged
- non-conduction of electric current
- low price, compared to substitutes
- subject to natural decomposition
- we send random rubber band color
