Product description:

- Pearl paints are water-based, transparent paints with a sparkling gloss, allowing for original decorative effects.
- They perfectly cover surfaces on substrates that absorb water well, e.g. paper, cardboard, paper pulp, ceramics and wood.
- The colors of the pearl paints can be easily applied next to each other because they do not blend together.
- After drying, they are resistant to abrasion.
- Pearl paints blend well with ASTRA poster paints, giving new, interesting color effects.
- The consistency of the paints allows you to paint without using water.
- To obtain a uniform and clean color, apply 2-3 coats of paint.
