Product description:

- Decorative paints with a metallic gloss are water paints with colors that are deceptively similar to the gloss of silver, gold, brass, copper and bronze.
- They are intended for decorative and general plastic works, perfectly cover surfaces on substrates that absorb water, e.g. paper, pulp, ceramics, cardboard, wood.
- The colors of the paints do not interpenetrate, so you can easily place one color next to the other.

-
- The paints are resistant to abrasion.
 - The consistency of metallic paints allows painting without the use of water.
 - In order to obtain good coverage, apply 2-3 coats of paint on the painted surface.
