## Product description:

- High-quality, durable non-slip adhesive tape, which, thanks to its rough surface, prevents slipping and provides stable adhesion to the substrate.
- Made of a special abrasive material that prevents the sole of the shoe from sliding off a given surface.
- With a rubber adhesive that does not damage the substrate, after removing the tape, the surface looks like it was before installation.
- Anti-slip tape is used in places where, in addition to

---

preventing slippage, we want to clearly mark some space, e.g. an escape route, routes and communication routes.

- Temperature resistance: -30C to + 70C.
- Intended for external and internal use.
- Tape width: 48 mm. Tape length: 5 m.
