Product description:

A set of thermosetting plastic FIMO Soft for making precise decorations, ornaments, figurines and jewelry.

- **"Brilliant Colors" set**
- The package contains 12 colored cubes of 25g
- Package size: 22 x 12 x 1.5 cm

FIMO Soft is the most popular series of modeling clay, used for

manual creation both as a hobby and for commercial purposes.

- The mass is ready to use right out of the box.
- After a while of kneading, it becomes very soft, plastic and smooth, allowing you to make precise decorations.
- After completing the work, the finished elements should be fixed by placing them in an oven preheated to **110 degrees Celsius for about 30 minutes** .
- What distinguishes FIMO modeling clay from the competition is invariability - after firing, the figures do not lose volume, color saturation, do not crack or crumble.

FIMO Soft mass is available in 29 colors per piece and in sets containing processing accessories and accessories for creating jewelry. The modeling clay of this brand can be safely used by the youngest - the products meet the requirements of EN 71-15 and the EU Toy Safety Directive.
