Product description:

Modeling clay Flamingo 6 colors

- High-quality thermosetting plastic mass intended for fun and learning in schools, art studios and at home, non-toxic.
- Before hardening, it resembles plasticine, but it is a mass that can be hardened by heating in the oven.
- Therefore, it is ideal for creating figurines, mock-ups, models or decorative objects (brooches, clips and key rings).
- Models can be made by hand or by squeezing patterns into molds.
- Hard modeling clay softens under the influence of the heat of human hands, thanks to which all manual work is performed in a pleasant and comfortable way.

-
- In order to harden the finished pattern, place the modeling clay in an oven preheated to 120-140C for 10-15 minutes or boil it in water for about 20-25 minutes.
 - After the annealing process is completed, you can coat the modeling clay with a little vegetable oil to obtain a deep color, you can also paint or varnish it.
 - The set includes 6 colors: white, yellow, red, green, blue, black.
 - Round modeling clay, diameter 11 mm.
 - Package size 11x9x1.6 cm
