**Product description:**

Face pencils in eight expressive colors, which thanks to their soft texture are perfect for drawing creative drawings on the skin. The set includes two glow-in-the-dark pencils that will give a phenomenal effect to the entire make-up. The crayons are safe to use, which is confirmed by dermatological tests. They have an ergonomic shape, thanks to which they perfectly fit the handle of each child. The pencils do not dry out on the skin, so they can be easily removed with water and soap, and any residues with a make-up remover.

Do you know that...?

---

Colors that glow in the dark, the longer they are exposed to sunlight or artificial light, the better they glow in the dark.
