**Product description:**

- Number of pages: 32

- 
- Format: A4
  - The book is an excellent teaching aid for preschool and early school education teachers, but it is also perfect for independent play.
  - What to do with used batteries? Why do we throw bottles and papers into separate containers? Why do we bring shopping in paper bags? The modern world presents responsible parents with further important tasks - shaping a pro-ecological attitude in a child and learning responsibility for the immediate environment. With our coloring book, it is easier to understand concepts such as recycling, waste segregation or eco-farm, and to answer the questions of what is a hydropower plant, what are the methods of saving water and energy, or why we should protect forests.
  - Simple exercises and games will help make the child aware of the importance of environmental protection and what everyone can do to save our planet together.
  - The book, published under the patronage of the League for Nature Conservation, perfectly complements pro-ecological pre-school and early school education.
