Product description:

DIY fridge magnets

- 4 different shapes
- set of colored films
- package dimensions: 19 x 21 cm

Colorino StarWars fridge magnets are a guarantee of unforgettable fun. Children love to create, and when your work can be displayed in the busiest place in the house, it is already a complete success. The set includes four different patterns of magnets prepared for colored sticking. It is enough to remove the protective paper stuck to

the magnet and put a color selected from among the enclosed squares on the place with a non-foiled side. Lots of different possibilities and combinations of sticking. There are two different sets of magnet figures in each series.

The method of making a color magnet:

- remove the white paper from the magnet
- put the foil (the colored part up) on the magnet with the adhesive layer
- press the foil against the magnet
- remove the remaining foil
- repeat the steps for the other colors
