**Product description:**

- Watercolors are watercolors that are used to paint on paper.
- They are in the form of dry buttons, which, when moistened with water, produce paints ready for use almost immediately.
- ASTRA watercolors consist of high-quality, finely ground pigments, combined with a water-soluble binder
- In addition to pigments and binders, watercolors contain fillers that make the paint matt as it dries.
- Thanks to this, by applying the paint thicker, you can paint using techniques similar to gouache, and in higher dilutions with techniques characteristic for watercolors.

---

- Watercolors can be used in combination with tempera paints, poster paints and ASTRA wax crayons.
- size of the buttons: 30mm
- number of colors: 12
