Product description:

- Convenient packaging with a transparent lid that can be used to mix colors
- Watercolor paints are water-based paints that are used to paint on paper.
- They are in the form of dry buttons, which, when moistened with water, provide ready-to-use paints almost immediately.
- ASTRA watercolors consist of high-quality, finely ground pigments, combined

with a water-soluble binder

- In addition to pigments and binders, watercolors contain fillers that make the paint matt as it dries.
- Thanks to this, by applying the paint thicker, you can paint using techniques similar to gouache, and in higher dilutions with techniques characteristic for watercolors.
- Watercolors can be used in combination with tempera paints, poster paints and ASTRA wax crayons.
- size of the buttons: 30mm
- number of colors: 12
