## Product gallery:

## Product description:

- A logical game that allows you to discover how objects, animals and everything around us change during the day and night.
- The artist-designed illustrations draw the attention of children and guide them in a logical association game, supporting the development of observation and concentration skills.
- It contains 6 mini-puzzles made of recycled materials, with topics researched to help children understand how objects observed during the day or night change, as well as get acquainted with a few nocturnal animals.
- Supports cognitive and motor development
- Made in Italy
