**Product description:**

- Contains 12 watercolor paints , placed in a plastic package and a brush.
- The lid of the package can serve as a palette for mixing the paints.
- Just mix them with water to get different shades of colors from dense, expressive to delicate, translucent.
- When combined with white paint, you can create entirely new shades. Watercolor can also be used in combination with other techniques (with tempera paints, poster paints and wax crayons).
- These paints will mainly serve children and schoolchildren beginning their art education.
- Thanks to the small size and handiness of the packaging, they can be easily carried, for example, in students' school bags and stored for a long time without fear of changing their properties.
