Product description:

- Decorative paints with metallic luster are water-based paints with colors that deceptively resemble the luster of silver, gold, brass, copper and bronze.
- They are designed for decorative and general artwork, perfectly covering surfaces on substrates that absorb water, such as paper, pulp, ceramics, cardboard, wood.
- The colors of the paints do not intermingle, so you can freely lay one color next to another.
- The paints are resistant to abrasion.
- The consistency of metallic paints allows painting without water.

-
- In order to obtain good coverage, 2-3 layers of paint should be applied to the painted surface.
